Leading The Civilian Work Force

Team,

1. I want to provide you with an update from our very productive civilian employee town hall.
2. Based upon our question and answer session and the ongoing efforts of our J1 team, I am pleased to announce two recent changes. First, the Department of Defense has changed the Priority Placement Program. Priority status changes will now increase the number of matches and placements for those in PPP. PPP Registrants will see faster placements once in the program.
3. Second, in the context of Sustaining the Force and Enhancing our USFK Team, we strive to enable the continued success of our valued civilian employees. To aid in this goal, I appointed 13 Activity Career Program Managers in Korea. These ACPMs will reach out to their respective careerists soon to mentor, coach, and assist with professional development needs.

We go together!
